

DeLaval Parlor P500

A System Approach

A woman with blonde hair, wearing a brown and white plaid shirt, blue jeans, and brown boots, stands with her arms crossed in a dairy parlor aisle. The aisle is lined with blue hoses and machinery. A large blue ribbon graphic curves around her, containing the text 'IT ALL REVOLVES AROUND YOU'.

**IT ALL REVOLVES
AROUND YOU**

 **DeLaval**

WHY IS IT BETTER?

Whether you are building a new dairy, or retrofitting a new system into your existing barn – The DeLaval Parlor P500 has been designed to do more on a smaller footprint, making it an obvious choice for high throughput, high efficiency dairy farms.

Robust, low noise, light weight sequence gates made from industrial HDPE material

3 cow flow control options

96"
(2438mm)
max ceiling height requirement for DeLaval SynchroArc™

Quieter milking environment

Up to
***56%**
reduction in exit cycle time with DeLaval SynchroSweep™

ZERO
obstructions at cow exit

Cow Comfort Sequence Gates removed during milking

Up to
***30%**
reduction in overall platform width

DeLaval Parlor milking system P500

The most
advanced parallel
parlor we have
ever created.

The DeLaval Parlor P500 represents the most significant evolution of parallel parlors. It is more than just a series of little changes – it represents a whole new approach to the task of moving your cows calmly, quickly and efficiently through the milking process.

DeLaval SynchroSweep™

DeLaval SynchroSweep™ features independently controlled, suspended, non-overlapping sequence gates. This design and process creates a quieter environment that improves cow flow and cow comfort.

DeLaval SynchroArc™

DeLaval SynchroArc™ is so much more than an open-bottom neckrail with no obstructions. It has been designed to increase milking routine efficiency with a smaller footprint and fewer vertical space requirements.

Synchronize your routine.

Whether you are building a new dairy, or retrofitting a new system into your existing barn – The DeLaval Parlor P500 has been designed to do more on a smaller footprint, making it an obvious choice for high throughput, high efficiency dairy farms.

When everything works together your milking system delivers the smoothest, calmest, most complete process from entry to exit. That's why we call it synchronized milking.

Designed to deliver a smoother milking process.

Everything we have done with the development of the DeLaval Parlor P500 is about helping you to make your dairy farm a safer, quieter, cleaner and more rewarding place to be – for workers, cows and for you.

DeLaval SynchroControl™

DeLaval SynchroControl™ is where everything comes together – and it all comes together where you milk.

With more information, more automation, more functions and more technology than ever before – DeLaval SynchroControl™ puts everything at your fingertips.

DeLaval InService™ All-Inclusive

With a DeLaval InService™ All-Inclusive agreement in place, for one agreed price, you can rest assured that every part of your system from scheduled servicing to routine maintenance, detergents to liners, vacuum settings to lubricants, cleaning, advice and everything in between; is working in harmony to deliver more, better quality milk.
